

# MD SHAHARIAR HOSSEN 夏日亚

## Artificial Intelligence Undergraduate Student

 Tianjin, China     17822243135     mdshahariar81@tiangong.edu.cn     Weixin ID: mdshahariar81

## ABOUT ME

Artificial Intelligence undergraduate student at Tiangong University with hands-on exposure to AI tools, prompt engineering, web technologies, automation, computer networking and web security. Experienced in WordPress, SEO, AI-assisted workflows, Git/GitHub and practical robotics projects. Interested in AI agents, intelligent systems, virtual simulation, robotics and emerging AI applications. Highly motivated to learn, experiment and contribute to research-oriented projects.

## EDUCATION & ACADEMIC BACKGROUND

2025 – 2029                      **Bachelor of Science in Artificial Intelligence**  
Tiangong University              Undergraduate Student | AI, Computer Science & Emerging Technologies

## TECHNICAL EXPERTISE & COMPETENCIES

|                            |                                                                                     |
|----------------------------|-------------------------------------------------------------------------------------|
| AI & LLM                   | Prompt Engineering · ChatGPT · Claude · Gemini · Doubao · AI Agent Concepts         |
| Web & Development          | WordPress · Elementor · HTML · CSS · JavaScript (Basic) · Python (Basic)            |
| Cybersecurity & Networking | HTTP/HTTPS · Burp Suite · Linux (Basic) · SQL Injection Fundamentals · Web Security |
| SEO & Digital Analytics    | SEO · Technical SEO · Google Analytics · GTM (Basic) · Google Sheets/Excel          |
| Automation & Tools         | Make (Basic) · Zapier (Basic) · Git/GitHub · VS Code · Arduino IDE                  |

## PRACTICAL PROJECTS & EXPERIENCE

### Web Development & SEO Projects

Independent / Client Projects  
Built and managed WordPress websites using Elementor, with hands-on experience in SEO, website optimization, analytics, tracking and digital workflows.

### Web Security Practice

Self-Directed Learning  
Practiced web security fundamentals including HTTP/HTTPS, Burp Suite, Linux and SQL injection through hands-on security labs and testing.

### Arduino-Based Smart Systems

Arduino IDE · Sensors · Embedded Systems  
Developed and tested sensor-based Arduino projects involving temperature monitoring, soil moisture detection, ultrasonic sensing and automated control. Used AI-assisted learning and troubleshooting to understand circuit logic and improve implementation.
